Demo Presentation - System Implementation

Chad E. Derrick

Live Demo

You can watch a demo at the following link:

https://www.youtube.com/watch?v=eUS4pSCD914

Current Uses

Currently, users can insert data as well as update data using SQL queries. Not much has been done yet, but more is to come.

Future Plans

I plan to add more features.

1. Product change history (Stock/Price/SKU/etc)
2. Separate user accounts (Manager and Employee)
3. A "reason" section for stock change
4. Text colors showing stock levels at a glance
5. More views to show important metrics
